

Third Declension Adjectives

Third-declension adjectives fall into three classes: 1) Adjectives of three terminations in the nominative singular - one for each gender; 2) Adjectives of two terminations; and 3) Adjectives of one termination. With rare exceptions, third declension adjectives follow the inflection of I-Stem nouns.

1. Third Declension Adjectives of Three Terminations:

2. Third Declension Adjectives of Two Terminations:

 supplex, supplicis, *suppliant*
 vetus, veteris, *old*

*The second entry is the genitive singular.

Note: Observe where the characteristic **-i** appears in 3rd declension adjectives:

- 1) **-i** in the ablative singular of all genders.
- 2) **-ium** in the genitive plural of all genders.
- 3) **-ia** in the nominative and accusative plural of the neuter.

A few third declension adjectives of one ending are declined without the characteristic **-i**. Thus, **vetus**, **veteris**, *old* **veterē** (abl. sing.), **veterum** (gen. plu.), **vetera** (neut. nom. and acc. plu.).

Of course a third declension adjective may be used with a noun of any declension. Note the following patterns:

3 endings	2 endings	1 ending
acer vir	omnis vir	sapiens vir
acris regina	omnis regina	sapiens regina
acre animal	omne animal	sapiens animal

Nine Irregular Adjectives

Nine adjectives of the 1st and 2nd declension have their genitive singular in **-ius** and their dative singular in **-i** in all genders. Otherwise they show the regular endings for adjectives of the 1st and 2nd declension (e.g., **bonus**, **-a**, **-um**). Their plurals are regular.

alius, alia, aliud, <i>other*</i>	totus, -a, -um, <i>whole</i>	alter, altera, alterum, <i>the other</i>
nullus, -a, -um, <i>no, none</i>	ullus, -a, -um, <i>any</i>	neuter, neutra, neutrum, <i>neither</i>
solus, -a, -um, <i>alone</i>	unus, -a, -um, <i>one</i>	uter, utra, utrum, <i>which (of two)</i>

Thus:

	Masc.	Fem.	Neut.
Sing.	solus	sola	solum
	solius	solius	solius
	soli	soli	soli
	solum	solam	solum
	solo	sola	solo
Plural:	soli	solae	sola
		etc.	

*Alius has *alterius* in the genitive singular (to avoid “alius”). Otherwise, it follows the pattern set forth above.

Note the similarities in the declensions of the pronouns **ipse**, **ipsa**, **ipsum**; **ille**, **illa**, **illud**; **iste**, **ista**, **istud**, all of which show the same pattern as above in the genitive and dative singular.
